# Angel Uribe

Snellville, GA

atu42461@uga.edu | [www.linkedin.com/in/angel-uribe-777066267](https://www.linkedin.com/in/angel-uribe-777066267) | <https://github.com/AngelTUribe>

---

## EDUCATION

**Kennesaw State University**

**Aug 2023 - June 2024**

**University of Georgia**

**Aug 2024 - June 2027**

**B.S.** in Computer Science

Athens, GA

**Relevant Coursework:** Data Structures; Systems Programming;  
Discrete Mathematics; Theory of Computation; Computer Algorithms

GPA 3.96/4.0

**Awards:** President's List; HSF Scholar; Hackathon Winner; Honors

---

## SKILLS & INTERESTS

**Programming Languages:** Python, Java, C++, SQL/MySQL

**Software Frameworks/Tools:** React, D3.js, Flask, Unix, GitHub

**Skills:** Data Analytics, Database Optimization, Software Development

**Linguistic Knowledge:** Spanish (Native), English (Native)

---

## EXPERIENCE

**UPS - Data Analytics Intern**

**May 2025 - August 2025**

- Built a software tool to visualize outbound package flows from facilities to their next destinations, providing insights into network distribution using React and D3.js
- Optimized MySQL queries for multi-million row datasets, improving query performance and reliability when handling large-scale logistics data.
- Designed dashboards and metrics to track total package volume and shipment statistics, supporting data-driven decision making.

**DevDogs**

**Aug 2023 - Present**

- Lead and mentored backend development teams in designing and implementing server-side logic for club projects.
  - Oversee code reviews, optimize system performance, and collaborate with other technical leaders to ensure seamless integration across all sections.
- 

## PROJECTS

**UPS Outbound Visualization Tool**

**Summer 2025**

- Engineered an interactive software system to visualize outbound package flows from UPS facilities, working with millions of data points and dozens of shipment attributes.
- Optimized MySQL queries for performance at scale, ensuring efficient processing of multi-million row datasets and integrated real-time data visualization with *D3.js*.

**AI-Powered Image Comparison**

**February 2025**

- Designed and trained an AI model for automated image comparison, identifying and highlighting differences between two photos with high accuracy.
- Utilized computer vision algorithms and machine learning techniques to optimize the model's performance in detecting subtle visual discrepancies.

**Interactive Portfolio Website - <https://angelturibe.github.io/my-portfolio/>**

**January 2026**

- Designed and built a modern personal portfolio using Next.js, React, Tailwind CSS, and Three.js, showcasing technical projects, experience, and visual storytelling.
- Implemented interactive 3D backgrounds and animations to create an engaging user experience while maintaining performance and responsiveness.
